On reference to Chapter 75 of the Session

> after providing that five of said board shall constitute a quorum; that they shall meet on the third Monday of Sept., in each year, &c.; goes on thus: "And they shall then examine the aggregate valuation of the taxable property of the several counties of this State, as returned to the Secretary of State, and for the purpose of asertaining the amount of State Tax to be applied n each County, for the current year shall increase or diminish the same in every county, so much per centum as may, in their opinion be necessary to produce a just relation between the valuation f the taxable property in the various counties." t is the aggregate valuation of the several counties that may be increased or diminished so much percentum, and not the separate totals of dis-

inct classes of property. Having seen what the Statute makes their luty. I must refer you to the statement appended to the official notification to the several counties of the amounts of their respective State Tax. Take your own county, Milwaukee, as an instance. You will see that whilst lands were increased in value about 230, and personal property about 390 per cent., City and Village lots were increased only 90 per cent. The change made in the assessment of this county was nearly as erroneous. To landed property was added 100, Questions to Invaling.—Patients desiring to ty about 390 per cent., City and Village lots were

to village 200, and to personal 300 per cent. In Washington county I see the personal property was increased about 700 per cent., but other property nowhere near the same ratio. In short, the original assessment throughout the State was made a nullity. Now, with a basis so constructed, it is impos sible that State taxation can be equal. Any one at all acquainted with an Assessment Roll, knows

that clerks must carry out the same per centage of taxation against all classes of property, and it is well that it is so; but if so carried out, it does not require a mathematician to see that one class of property pays, in part, the taxes of an. other class, and that thousands of persons who are not liable to pay a tax on personal property, legally, have to do so by virtue of authority assumed by the State Board of Equalization. From the fact that counties were in the habit

of keeping their assessment as low as possible, and some, more unscrupulous than others, in order to reduce the amount of their State tax, a State Board of Equalization was absolutely necessary, but we did not require them to mequalize, and I consider that the Session Law of 1854, room another nation its domains, because we want tiem, is an abandonment of the honest charac er which our country has acquired. To proved a hostilities by unjust assumptions, would be to acrifice the peace and character of the country, when all its interests might be more cerwith its amendment of '55, if properly construed. is amply sufficient to produce the desired result, viz: a just relation in the assessed value of the several counties.

I conceive that the State Board of Equalization occupies precisely the same relative position to the counties of the State, as the county Board of Supervisors do to the towns of their respect Ive counties; and the people, on the day of review of the assessment, to their town assessment. Now, who ever heard of a Board of County Supervisors raising one class of property two or three hundred, and another class in the same town only fifty or a hundred per cent., and perhaps the same thing reversed in an adjoining town? Yet this is precisely what was done last year by the State Board.

After the assessment has been reviewed by the people, it should be considered correct; in so far as one class of property relatively with another
